17. EMPLOYEE BENEFIT OBLIGATIONS (cont’d)**Retirement Pay Provisions**

Under the Labour Law, the Company is required to pay termination benefits to each employee who has completed one year of service and whose employment is terminated without due cause, is called up for military service, dies or who retires after completing 25 years of service (20 years for women) and achieves the retirement age. Severance payment provision is calculated as 30 days gross salary for each service year.

The provision has been calculated by estimating the present value of the future probable obligation of the Company arising from the retirement of the employees.

Retirement pay liability is not subject to any kind of funding legally. Provision for retirement pay liability is calculated by estimating the present value of probable liability amount arising due to retirement of employees. TAS 19 (“Employee Benefits”) stipulates the development of Company’s liabilities by using actuarial valuation methods under defined benefit plans. In this direction, actuarial assumptions used in calculation of total liabilities are described as follows:

	30 June 2019	31 December 2018
Net discount rate (%)	% 2,49	% 2,01
	30 June 2019	31 December 2018

Payments during the year	(237.277)	(170.782)
End od the period	722.970	675.428

The principal assumption is that maximum liability of employee termination benefit for each year of service will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. As the maximum liability is revised semi-annually, the maximum amount of TL 6.017,60 which has been taken into consideration in calculating the reserve for employment termination benefit of the Company.

Amount of payable consist of one month’s salary limited to a maximum of full 6.017,6 TL as of 30 June 2019 (31 December 2018: 5.434,42 TL).

Corporate Tax

The corporate tax rate is 22 % in the year 2019 in Turkey. The corporate tax rate which will be realized over the corporate earnings that is subject to taxation, is calculated over the tax assessment after adding the non-deductible expenses and deducting the tax- exempt profit, income that are not subject to taxation and other discounts (if there is previous year losses and utilized investment discounts).

In accordance with the regulation numbered 7061, published in Official Gazette on 5 December 2017, "Bazı Vergi Kanunları ile Diğer Bazı Kanunlarda Değişiklik Yapılmasına Dair Kanun", corporate tax rate for the years 2018, 2019 and 2020 has increased from 20% to 22%. Therefore, deferred tax assets and liabilities as of 31 December 2017 are calculated with 22% tax rate for the temporary differences which will be realized in 2018, 2019 and 2020, and with 20% tax for those which will be realized after 2021 and onwards.

According to Turkish tax legislation, tax returns, financial losses on income for the period, not exceeding 5 years. However, it is not permitted to deduct loss from retained earnings. There is no any implementation with the tax authorities in Turkey about the tax payments to reach a mutual understanding. The corporate tax return must be filed by the 25th day of the fourth month after the end of the company's accounting period. Furthermore, tax authorities has the authority to inspect the accounting records in 5 year. In case the tax authority ascertains any faulty in records, the amount of tax that will be paid can change.

Financial Risk Factors**Credit Risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to significant concentration of credit risk consist principally of cash and cash equivalents and trade receivables. Maximum credit risk on the Company is limited to the amounts disclosed on the financial statements.

The Company maintains cash and cash equivalents with various financial institutions. It is the Company's policy to limit exposure to any one institution and revalue the credibility of the related financial institutions continuously.

The credit risk associated with trade receivables is partially limited due to a large customer base and due to management's limitation on the extension of credit to customers. The Company generally requires collateral to extend credit to its customers excluding its distributors.

The Society's credit risks mainly arises from trade receivables. The Company manages this risk by limiting the duration of the credit. Credit limits are monitored regularly by the Company and the customer's financial position, taking into account the customer's credit quality and other factors considered. The Company does not have any derivative financial instruments. (31 December 2018: None).

Liquidity Risk

Liquidity risk is the risk that an entity will be unable to meet its net funding requirements. The risk is mitigated by matching the cash in and out flow volume supported by committed lending limits from qualified credit institutions. The maturity breakdown of financial assets and liabilities has been indicated by considering the period from the balance sheet date to maturity date. Those financial assets and liabilities which have no maturities have been classified under “1 to 5 years”.

Based on the expected maturity of the liquidity management of the Company, carries out under the contract in accordance with the maturity.

Market Risk

Market risk due to changes in market prices, the fair value or future cash flows of a financial instrument will negatively affect a business is the risk that fluctuations.

Interest rate risk

Interest rate risk arises from the possibility of interest rate changes that affect the financial statements. The Company is exposed to interest rate risk because of timing differences of its assets and liabilities which is expired in a current period. There is not any risk management pattern and implementation which is defined and in Company. Company administration manages the interest rate risk by making decision and with its implementations although there isn't any risk management model defined in the Company.

As of 30 June 2019 and 31 December 2018, the Company's interest position is as follows:

Financial instruments with fixed interest	30 June 2019	31 December 2018
Borrowins (Not 7)	772.824	3.183.478
Cash and Cash Equivalents (Not 5)	3.119.872	5.794.739

The estimated fair values of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies.

Fair value hierarchy table

The Group classifies the fair value measurement of each class of financial instruments according to the source, using the three-level hierarchy, as follows:

Level 1: Market price valuation techniques for the determined financial instruments traded in markets (unadjusted)

Level 2: Other valuation techniques includes direct or indirect observable inputs. The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates.

Level 3: Valuation techniques does not contain observable market inputs.

The Company does not have any hedge accounting practice. (31 December 2018: None).
